

Integrate Flask with Scoring End Point:

```
app = Flask(__name__)

##session key
app.secret_key = 'abcdef'

#####

UPLOAD_FOLDER = 'static/upload'
ALLOWED_EXTENSIONS = { 'csv' }

app.config['UPLOAD_FOLDER'] = UPLOAD_FOLDER

#####

@app.route('/', methods=['GET', 'POST'])
def index():
    msg=""

    if request.method=='POST':
        uname=request.form['uname']
        pwd=request.form['pass']
        cursor = mydb.cursor()
        cursor.execute('SELECT * FROM admin WHERE username = %s AND password = %s', (uname, pwd))
        account = cursor.fetchone()
        if account:
            session['username'] = uname
            return redirect(url_for('admin'))
        else:
            msg = 'Incorrect username/password!'
    return render_template('index.html',msg=msg)
```
